

GENERAC | LINK Manager

Be Storm Ready Before the First Drop Falls

No One Can Afford Downtime

When the forecast shifts, preparedness isn't optional – it's essential. Generac Link Manager gives customers the power to stay ahead of the storm with **real-time remote monitoring** and control of backup power systems.

Whether you're managing a single critical site or a fleet of hundreds, Link Manager delivers insights and oversight when they matter most.

Power Continuity Matters Most

During outages, storms and emergencies, Generac Link Manager is your proactive software solution designed to help you manage equipment, monitor fleet status, and prevent surprises before, during and after severe weather events.

Generac Link Manager gives you peace of mind through storm season.

Real-Time Dashboard Monitoring

Get a big picture, live snapshot of your entire fleet's readiness – from status and alarms to fuel, run hours and more – all in one convenient dashboard.

Fuel Levels

Keep fuel levels visible across all sites. Receive low-fuel alerts before tanks run dry and eliminate the need for manual checks when storms are imminent.

Oil Pressure & System Health

Monitor oil pressure, temperature and other vital stats to help keep equipment operating efficiently when it's needed most.

Scheduled Dispatch & Group Control

Push test runs or full start commands across multiple sites ahead of a storm. Build region-specific schedules for storm zones.

Alarm Notifications & Diagnostic Alerts

Be ready to react in real time. Configure alerts by region, user or equipment type that get routed to technicians or key personnel.

NFPA 110 Compliance Reporting

Automated reports eliminate manual logs and help customers maintain compliance during emergency power operations.

Built for Fleet Resilience

- Avoid costly service calls by diagnosing issues remotely
- Stay in control when access to sites is limited
- Prioritize fuel delivery with fleet-level fuel tracking
- Minimize outages with preemptive alerts and status dashboards

Storms Are Unpredictable.
Your Preparedness Shouldn't Be.
